valve**

12.05

**Technical Description**

Pressure measuring instruments with capsule element and steel housing, as per DIN EN 837-3, for measuring small overpressures:

- accuracy class 1.6
- high reliability
- overload-proof (1.3 x scale interval)
- zero point correction
- measuring system copper alloy

**Display ranges**

- 0 - 25 mbar
- 0 - 40 mbar
- 0 - 60 mbar
- 0 - 100 mbar
- 0 - 160 mbar
- 0 - 250 mbar
- 0 - 400 mbar
- 0 - 600 mbar

Pressure measuring instruments with spiral element and steel housing, as per DIN EN 837-1, for measuring high overpressures:

- accuracy class 1.6
- high reliability
- sheet steel case

**Display ranges**

- |             |              |
|-------------|--------------|
| 0 - 1.0 bar | 0 - 6.0 bar  |
| 0 - 1.6 bar | 0 - 10.0 bar |
| 0 - 2.5 bar | 0 - 25.0 bar |
| 0 - 4.0 bar |              |

**Application**

The pressure measuring instruments are used in the areas of burner monitoring, filter status measurement, air conditioning engineering and in laboratories. Suitable for gases of gas families 1, 2, 3 and other neutral gaseous media.

## Accessories

### Order No.

Push button cock DKH	033 621
Pressure gauge shutoff valve MAV	230 762

## Technical description

**DKH:** Manually operated shutoff device between measuring line and pressure gauge according to DIN 3537-1. In the normal state, the push-button cock is closed. Therefore, the pressure gauge is permanently relieved of pressure. The push-button is pushed in order to apply pressure on the pressure gauge and indicate the operating pressure.

**MAV:** Manually operated shutoff and flow control device between measuring line and pressure gauge in accordance with DIN 16270.

## Application

Suitable for gases of families 1, 2, 3 and other neutral gaseous media.

## Approvals

DVGW type approval certificate:
